Southern Retina, LLC CHARLES L. HARRIS, MD

State-of-the-art retinal care that's focused on you

MORE NATURAL VITAMIN

FOR YOUR MAGULA AND RETINA

Smaller pills and more nutrients than other vitamins with cost savings.

CONFUSION AT THE DRUG STORE SOLVED

he number of eye supplements at the stores we patronize are overwhelming. Ingredients you do not need and not enough of what you do need for macular health is a concern. This formulation addresses those issues by containing only what has been shown, in well-designed studies and clinical trials, to help the macula and retina. This vitamin is designed for people with macular

degeneration or a family history of macular degeneration.

SUPPLEMENT FACTS

Serving Size: 2 Capsules Servings Per Container: 60 Amount Per Serving Vitamin C (ascorbic acid) 833 % Vitamin E (d-alpha tocopherol) 1,333 % /itamin B-6 Folate (5-methylfolate) 200 % Vitamin B-12 (methylcobalamin) 1000 mar 16.667 % Zinc (citrate) 25 mg 167 % Copper (citrate) 50 % Lutein (standardized to 5% zeaxanthin) * Daily Value not established

You need to know:

Lutein

To replenish the macular cells, higher potency is needed than is widely available. This formula offers much more lutein for less cost.

Folate

Better than folic acid: Activated (methyl) folate is more natural, better absorbed and has a better safety profile.

B vitamins

A large study over 7 years showed patients taking B vitamins in high potency had fewer cases of new macular degeneration and slowed progression.

A.R.E.D.S

The Age Related Eye
Diseasese Study (AREDS) showed high levels of
antioxidants and zinc in this
formula can reduce the risk of
developing advanced macular
degeneration by 25 percent.

Cost savings

This combination costs over 60 dollars in stores and online, and would have to be purchased as 3 separate bottles and 4 pills a day.
